Canada’s universities train the innovators of tomorrow that are needed in every region of Canada. To make sure that young talents are able to access a dynamic environment across Canada, we need to support research capacity of all universities.

We must support all universities with better access to research funding so that professors across Canada can train our next generation of innovators and strengthen our communities.

Strong innovation culture is the foundation of successful modern societies driving our economic growth and our standard of living. A persistent national challenge remains: Canada is consistently ranked as a mid-level innovator.

We must support all universities with better access to research funding so that professors across Canada can train our next generation of innovators and strengthen our communities.
